PROFESSIONAL SUMMARY

Results-oriented Software Engineer and Full-Stack Developer with hands-on experience in building scalable web applications, real-time backend APIs, and low-level system utilities. Proficient in React.js, Node.js, Python, and C++, with a strong foundation in Data Structures, Algorithms, and performance optimization. Proven track record of optimizing application runtime and database queries to enhance user experience and system reliability in fast-paced engineering teams.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), C/C++, Python, HTML5, CSS3, SQL

Frontend Technologies: React.js, Redux Toolkit, Context API, Tailwind CSS, Responsive Web Design

Backend & Databases: Node.js, Express.js, RESTful API Design, MongoDB, Mongoose ODM, JWT Authentication

Developer Tools & Systems: Git, GitHub, CMake, Wireshark, PCAP, Postman

Core CS Concepts: Data Structures & Algorithms (DSA), OOP, Memory Management, Performance Optimization

PROFESSIONAL EXPERIENCE

Web Development Intern

July 2024 – August 2024

PrernaGati Technology

Jammu, J&K

- Engineered responsive mobile-first React.js/Tailwind CSS interfaces, boosting user engagement metrics by **18%**.
- Designed a modular React component library with Redux Toolkit, reducing codebase redundancy by **40%** and page load times by **35%**.
- Collaborated with backend engineers to integrate RESTful APIs, improving asynchronous data handling.

C/C++ Developer Intern

June 2023 – July 2023

Programming Pathshala

Jammu, J&K

- Optimized C++ algorithmic pipelines from $O(N^2)$ to $O(N \log N)$, achieving a **25% reduction in runtime**.
- Debugged segmentation faults and optimized memory allocation via GDB, increasing reliability by **30%** and saving **15%** RAM.
- Conducted unit testing and peer code reviews to enforce software development standards and maintain high code quality.

TECHNICAL PROJECTS

KalaKart – Artisan E-Commerce Platform | [GitHub](#) | [Live Demo](#)

- Architected a secure full-stack e-commerce app with role-based JWT authentication and bcrypt credential encryption.
- Optimized MongoDB schemas and compound indexing, decreasing API response latency by **35%** and bounce rates by **22%**.
- Designed responsive UI layouts and state synchronization across complex multi-step checkout flows.

Anabella Bot – AI Productivity Assistant | [GitHub](#)

- Developed a Python virtual assistant to automate productivity workflows like email dispatch and scheduling.
- Integrated Gmail and Google Calendar APIs via OAuth 2.0, reducing automated workflow execution latency by **85%**.
- Built robust error handling and logging systems to ensure reliable execution of background cron jobs.

OmniData – Business Analytics & Strategy Simulation | [GitHub](#) | [Live Demo](#)

- Architected a client-side Single Page Application (SPA) utilizing modular ES6 scripts to model operational, retail, and financial feedback loops on the Tableau Superstore dataset.
- Engineered cross-module strategic dependencies connecting warehouse inventory levels, logistical delays, customer churn risk, and LTV calculations in real-time.
- Developed an in-browser interactive SQL console enabling recruiters to run live SQL database queries (SELECT, WHERE, LIMIT) on active transaction tables.

EDUCATION

Model Institute of Engineering and Technology (MIET)

Jammu, J&K

Bachelor of Engineering (B.E.) in Computer Science and Engineering

2022 – 2026

- Cumulative CGPA: 6.63 / 10.0
- Core Coursework: Data Structures & Algorithms, Database Management Systems (DBMS), Operating Systems (OS), Computer Networks, Software Engineering, Object-Oriented Programming (OOP)

CERTIFICATIONS

Introduction to Python | [Verify](#) – Accredited certification validating functional knowledge of scripting and automation.

Introduction to Artificial Intelligence | [Verify](#) – Certification covering machine learning models and automation workflows.
